EDUCATION

University of Maryland, College Park
Bachelor of Science, Computer Science and Mathematics

August 2018 - December 2021
Overall GPA: 3.71

WORK EXPERIENCE

VMware, Inc.
Software Engineering Intern - VMware Cloud on AWS
· Will contribute to VMware's VMC on AWS team during Summer 2020

May - August 2020
Palo Alto, CA

Symantec Corporation
Software Engineering Intern - Cloud Platform Engineering

May - August 2019
Mountain View, CA

- Developed a lightweight, configurable, and containerized application in **Golang** to report metrics for any given microservice, with minimal developer effort. Currently used in production environments.
- Added features to a **Python** deployment tool to support new security features for the cloud platform
- Implemented **Jenkins** integration tests for a cloud service by adding thorough test cases for 10+ REST endpoints
- Designed **Grafana** dashboards to visualize metrics from any service, improving understanding of platform health

HuEx, Inc.
Data Analysis Intern

June - November 2018
Palo Alto, CA

- Analyzed 10 GB of raw CSV travel data to identify product-market fit and target markets with **Pandas**
- Scraped websites with **Python**, **Selenium**, and **BeautifulSoup** for data that helped decide target market

TECHNICAL SKILLS

Languages	Python, Java, Golang, C, SQL, Matlab, Linux Bash, \LaTeX , JavaScript, Git
Frameworks	Docker, Kubernetes, Jenkins, Scikit-Learn, TensorFlow, Jupyter notebooks, Pandas, Selenium
Technologies	Deep Learning, Data mining, Build automation, Containers, Microservices/Service Mesh

PERSONAL PROJECTS

Moody HackRU — March 2019

- Trained a custom deep CNN to predict a user's emotion with a picture of their face using GCP and TPUs
- Designed and implemented a novel data pipeline to minimize response times and improve accuracy, using **Flask**
- 1st place winner and best AI hack @ HackRU, out of 100+ projects

Improving Breast Cancer Diagnosis through Machine Learning September 2017 - May 2018

- Compared various ML algorithms (**KNN**, **SVM**, **Logistic Regression**, **Neural Nets**) on a 30 feature, 500+ record dataset describing the cells from a tumor biopsy (numerical values regarding size, texture, etc.)
- Tested **principle component analysis** to evaluate accuracy loss and improvement in training time
- Won Best of Championship award at Synopsys Silicon Valley science fair out of 2000+ projects
- Represented Silicon Valley in Intel International Science Fair 2018

Open Sesame – Wi-Fi Garage Door Opener June 2018

- Designed and assembled a **Raspberry Pi** based system that provides an online interface to the garage door
- Implemented a logging system for both Wi-Fi and local opens and closes of the garage door

EXTRACURRICULARS

Logistics Director @ Bitcamp November 2018 - Present

- Leading a team of 20 to provide networking, A/V, workshops, and scheduling for the largest collegiate hackathon
- Determined travel reimbursement rules and implemented automation scripts for their assignment
