

# Dhanvee Ivaturi

dhanvee.xyz | (408)618-9927 | dhanvee@umd.edu | GitHub://Ludikrous | LinkedIn://Dhanvee

## EDUCATION

**University of Maryland, College Park**  
Bachelor of Science, Computer Science and Mathematics

**August 2018 - Decemeber 2021**  
Overall GPA: 3.67

## TECHNICAL SKILLS

<b>Languages</b>	Python, Java, Golang, SQL, Matlab, Linux Bash, LaTeX, JavaScript, Git
<b>Frameworks</b>	Docker, Kubernetes, Jenkins, Scikit-Learn, TensorFlow, Jupyter notebooks, Pandas, Selenium
<b>Technologies</b>	Deep Learning, Data mining, Build automation, Containers, Microservices/Service Mesh

## WORK EXPERIENCE

<b>Symantec Corporation</b>	<b>May - August 2019</b>
Software Engineering Intern - Cloud Platform Engineering	Mountain View, CA
<ul style="list-style-type: none"><li>· Implemented <i>Jenkins</i> integration tests for a cloud service by adding thorough test cases for 10+ REST endpoints</li><li>· Created a configurable and lightweight metrics reporting container in <i>Golang</i> - works with all Symantec products</li><li>· Designed <i>Grafana</i> dashboards to effectively visualize metrics from any given service</li></ul>	

<b>HuEx Inc</b>	<b>June - November 2018</b>
Data Analysis Intern	Palo Alto, CA
<ul style="list-style-type: none"><li>· Analyzed 10 GB of raw CSV travel data to identify product-market fit and target markets with <i>Pandas</i></li><li>· Scraped various websites with <i>Python</i>, <i>Selenium</i>, and <i>BeautifulSoup</i> for data that helped decide target market</li></ul>	

## PERSONAL PROJECTS

<b>Moody</b>	<b>HackRU — March 2019</b>
<ul style="list-style-type: none"><li>· Implemented a deep CNN to predict a user's emotion with a picture of their face using GCP and TPUs</li><li>· Designed and integrated ML backend with web backend using <i>Flask</i></li><li>· <u>1st place winner and best AI hack @ HackRU</u></li></ul>	

<b>Improving Breast Cancer Diagnosis through Machine Learning</b>	<b>September 2017 - May 2018</b>
<ul style="list-style-type: none"><li>· Compared various ML algorithms (<i>KNN</i>, <i>SVM</i>, <i>Logistic Regression</i>, <i>Neural Nets</i>) on a 30 feature, 500+ record dataset describing the cells from a tumor biopsy (numerical values regarding size, texture, etc.)</li><li>· Tested principle component analysis to evaluate accuracy loss and improvement in training time</li><li>· Won <u>Synopsys Silicon Valley science fair</u>, competed in the <u>Intel International Science Fair 2018</u> as a finalist</li></ul>	

<b>A Deep Learning Approach to Lossy Image Compression</b>	<b>January 2019 - Present</b>
<ul style="list-style-type: none"><li>· Working in a team of 3 under the guidance of Dr. Raymond Tu @ the FIRE COML lab</li><li>· Exploring the use of image segmentation and autoencoders for superior image compression</li></ul>	

<b>Open Sesame – Wi-Fi Garage Door Opener</b>	<b>June 2018</b>
<ul style="list-style-type: none"><li>· Designed and assembled a system with a <i>Raspberry Pi</i> that would provide an online interface to the garage door</li><li>· Created an intuitive and clean interface for family members to open and close the garage door</li><li>· Implemented a logging system for both Wi-Fi and local opens and closes of the garage door</li></ul>	

<b>Project Incendium</b>	<b>SBHacks — December 2018</b>
<ul style="list-style-type: none"><li>· Implemented a neural network model to predict the size of a wildfire based on location, temperature, etc.</li><li>· Scraped historical weather data to look for correlations between weather patterns and wildfires</li></ul>	

## EXTRACURRICULARS

<b>Logistics Director @ Bitcamp</b>	<b>November 2018 - Present</b>
<ul style="list-style-type: none"><li>· Leading a team of 22 to provide networking, A/V, workshops, and scheduling for the largest collegiate hackathon</li><li>· Determined travel reimbursement rules and implemented automation scripts for their assignment</li></ul>
